

Student First Names	Student Surname	Degree Title	1st Supervisor	2nd Supervisor
Selda Emine	Ulucanlar	Randomised controlled trials and equipoise	Jenny Donovan	Paul Dieppe
Fiona	Mackichan	Chronic pain in older adults: The experience of pain and help seeking	Rachel Gooberman Hill	Paul Dieppe
Jane Antonia	Vosper	Using Stated Preference Choice Modelling To Determine Preferences For Treatment Of Depression	Terry Flynn	Joanna Coast
Suzanne	Ingle	Modelling waiting times for HIV antiretroviral therapy in resource poor settings	Margaret May	Jonathan Sterne
Rita	Patel	Socioeconomic position and health in children in Belarus	Richard Martin	Debbie Lawlor
Mari-Anne	Rowland	The IGF System in Prostate Cancer Aetiology and Prognosis	Richard Martin	David Gunnell
Lina	Chen	Genetic Epidemiological Study of Prostate Cancer	Sarah Lewis	David Evans
Shu-Sen	Chang	Epidemiology of suicide in Taiwan: secular trends and contextual factors	David Gunnell	
Milena	Simic-Lawson	Public Health Aspects of HIV in Montenegro	Matthew Hickman	
Kate	Birnie	Diet and Socioeconomic circumstances in childhood and functional disability in old age	Richard Martin	Yoav Ben-Shlomo
Deborah	Wilder	Adolescent Health Behaviour	Rona Campbell	
Alexandra Mary	Hodsman	Is performance against national audit standards for mineral metabolism in patients on renal replacement therapy linked to differing practice patterns in UK renal units?	C Tomson	Ben-Shlomo
Simon Michael	Collin	Folate metabolism and prostate cancer	Richard Martin	Chris Metcalfe
Rachael	Hughes	Missing data methods in applied research	Jonathan Sterne	Rona Campbell
Luisa	Zuccolo	Alcohol and prostate cancer: A Medelian randomisation approach	Sarah Lewis	George Davey Smith
Jacky	Chau	Investigation of the role of bone size relative to body size in the pathogenesis of fractures in childhood	Jon Tobias	Kate Tilling
Hannah	Christensen	Modelling the Impact of Vaccination Targeted Against Serogroup B Meningococcal Disease	Matthew Hickman	Caroline Trotter
Christopher	Raistrick	Data Mining Developments to Identify Members of a Newly Defined Category of QTLs:STEPS	Tom Gaunt	Ian Day
Rachel	Humphriss	Balance problems and Dizziness in Childhood	John Macleod	Amanda Hall
Angus Gregor Keith	McNair	Information and informed consent for gastrointestinal cancer surgery	Jane Blazeby	Kerry Avery
Christopher Robert	Boustred	Somatic and population studies of KCNH2 sequence diversity and function: relevance to dysrhythmias and drug side-effects in the population	Ian Day	Jules Hancox
Neil Martin	Davies	Identificaton of causal treatment effects in observational studies	Richard Martin	Frank Windmeijer
Dylan Michael	Williams	Vitamin D and cardiovascular and metabolic health	Debbie Lawlor	Abigail Fraser

John Peter	Kemp	Australian Genome-wide Association Study of Osteoporosis	David Evans	Jon Tobias
Anya	Burton	Identification and Assessment of Markers of Progression of Localised Prostate Cancer	Richard Martin	Kate Tilling
Amy	Taylor	Genetics of abdominal adiposity in Indians	Yoav Ben Shlomo	George Davey Smith
Antri	Giannakou	Predicting the progression of cognitive impairment in memory clinic attendees	Chris Metcalfe	
Celia	Gregson	The epidemiology and genetics of high bone mass	George Davey Smith	Jon Tobias
Rebecca	Gilbert	Associations of circulating vitamin A, D and E levels and their determinants with screen-detected prostate cancer: A large population-based case control study	Richard Martin	Chris Metcalfe
Ruth	Kipping	Developing Methods to Prevent Obesity in Children	Debbie Lawlor	
Mari-Rose	Kennedy	Ethical aspects of epidemiological research on young people involving linkage to routine individual data	Ainsley Newton	Catherine Heeney
Alexander	Stiby	Causal Inference in Observational Studies of Substance Abuse	John Macleod	Matthew Hickman
Tamuno	Alfred	Genetic studies of ageing - with a focus on those potentially informative about modifiable factors.	Ian Day	Yoav Ben-Shlomo
Shelley	Potter	Quality of Life Following Mastectomy	Jane Blazeby	Simon Cawthorn
Ghazaleh	Fatemifar	Fine mapping of the association between osterix genotypes and BMD in children	Jon Tobias	Dave Evans
Osama Ahmad Ali	Alghamdi	Genotype Influences on Reference Ranges of Clinical Analytes	Santi Rodriguez	Ian Day
Lynsey	Webb	Management and survival of failed renal transplant recipients	Yoav Ben-Shlomo	Charlie Tomson
Galit	Geulayov	Secular trends and intergenerational influences on suicidal thoughts in the Young Hunt study.	David Gunnell	Sara Brookes
Hashem Ali	Shihab	Genomic Aspects of Common Disease Genetic Effect	Tom Gaunt	Julian Gough
Retha	Steenkamp	Multiple imputation of missing data and prognostic survival modelling in patients starting renal replacement therapy.	Margaret May	Paul Roderick
Poornima	Prabhakaran	Association between parental height and cardiometabolic risk profile in the offspring - A transgenerational study in a birth cohort	George Davey Smith	Yoav Ben-Shlomo
Emily	Nicoli	Coinfection between Influenza and Invasive Pneumococcal Disease	Caroline Trotter	Caroline Colijn
